Dear Sir, Thave to request that you will furnish me with a list of the employer of your Department stating their distribution, order of merit as to capacity and moral character, and the name of those whose services can be dispensed with, without detriment byour operations. The information requested will be considered confidential. Jas. Pollock Jas. Pollock Strector of the mint, Assayer, U. S. Mint.

The Assayer Engaver Isomer & P. A. & Corner + The mir. Report as to number of Employers & requested May 18, 1861.

Alint of the United States, Philadelphia, May 18. 1861.

Sir.

As requested in your letter of the 4th wist. I have carefully considered the subject of procuring a supply of silver bullion to enable the Mint to furnish the amount of silver com's required by the Preasury of the United States.

of silver bullion in this bity and tealfork, is not large; and the interruption of commerce with New Orleans and Mexico leads to the belief that a sesseity of silver is lobe apprehended. From two to three hundred thousand douans of silver Coned honor, now be purchased at Sen york, at say \$1.22 per owner standard, which is one cent per or; more than the present mins price.

The Superintendent of the asseny Office at New York reports that about \$180.000, is due to depositors at that office, for which the owners would accept fold in payment. The Depositors of Silver at this Mint uned also, in most cases prefer to receive foed como. As this silver has been purchased at the rate of \$1,21 per ounce standard, if we had at our Command a sufficient amount in foed com, it is evident that by Exchanging it for this silver the government could Secure a sufficient Supply of helion, without increasing the price, sufficient to meet all its demands for silver Como. I therefore suggest that transfer drafts of small amount, say \$ 20,000 each, be issued in favor of the Breasurer of the Minton the assistant Frasurer as New York, to the aggregate of \$180,000 or \$200,000 payable in fold como. As the assung Office Silver above Referred to is, for the most part, now in the mint if There drafts were now in our popeforon we could formand them to New york in payment for such dullin and for other

deposits due, without any actual transfer of treasure, and reserve at the Mint, to the credit of the United States, and surgest to its draft, an equivalent amount in selver com. Showed the above suggestion meet your approval, I will thank You to indicate the amount of the different denominations of Delver coin, the Treasury Mill require. I have the honor lobe, With gear respect, You obedient Demant, Director of the Mins. Itom S. Picharo, Secretary of the Creasury, Washington City,

The See Revour In alation to procuring Supply of Silver Bullin for Cowings. Mode Suggested + hursofu drofts arrialfor

THE REPORT OF SHEET

May 18,1861.

a majerial particular

to be a faid care a

Mint of the United States. Philadelphia May 18.1861. I have carefully considered the subject of procuring a supply of silver bullion to enable the elbint to furnish the amount of Silver como pequined by the masury of the United States. Silver bullion in this bity and ten york is not largo; and the interruption of lowmerce With New Orleans and Mexico leads to the belief that a searcity of vilver is lote approperded. From two to three hundred thousand docears of Silver, could however, non be purchased at New York, at say. #1.22 per ource standard which is one cont per of more than the present mis price. The Superintendent of the assay \$180,000 on silver is due to depositors at that Office, for which the owners would accept fold in payment The depositions of silver or this mins uned also, in

most cares prefer to receive goed coms. At this silver has been purchased at the rate of \$1.21 per ounce standard, if we had atom command a sufficient amoun in gold com, it is evident that by Exchanging It for this silver the government could secure a supply of ballion at a moderate price . Sufficient to meet are its demands for silver coins. I therefore suggest that transfer drafts of Small amount, Say \$ 20,000 each be issued infavor of the Creasurer of the Mint on the assistant Treasurer as hen York, to the aggregate of \$180,000 or \$200,000, payable in force coins. As the serray office sieve as referred to is. for the most hart, now in the mins, if there drafts were at this time in our hopepain we coved forward them to elew Mort in payment for such bullion and for other deposits due, without any actual transfer of Treasure, and reserve at the (Mint, to the credit of the Musted States, and subject to its draft, an equivalent amount in Siever end. Showed the above Suggestion mest your approval, I will thank you to indicate the amount of the different Henromenations of dilun soin, the Theren

in heart office.

Invo 6.1861.

Abint of the United States, Philadelphia, June 4' 1861 Sir, In reply to the letter from the Secretary of Costello, a derki in my office, in regard to leave of abunce being granted to him, in the Event of his entering the military service, I have to report that, as yet, the contingency anticipated by Mr Castello has not occurred, For some week's past he has been engaged in the enhan to recruit volunteers for a Company to be commanded by himself, but the roll is not, and probably will not. be complete. Consequently he has not been mustered into the military service, and there is no present necepity for deciding the question presented by his letter, But I deem it proper to say, that while I am willing and anxious, in all proper ways, to promote the service of the Lovernment in repelling the Unholy War waged against it by traitors and rebels, yet I doubt if I have any legal authority to give any extended leave of

absence to those seeking military employment) There is an express provision of law that no officer in any branch of the public service, or other person whose salary pay or smolument is or are fixed by law or regulations, shall receive any additional pays Extra allowance or compensation in any form whatever for the disbursement of public money or for any other service or duty whatsoever, unless the same shall be authorized by law, and the appropriation therefor explicitly set forth that it is for such additional pay, extra allowance or compensation," On view of this enactment, and of the manifest impropriety of drawing double pay for the performance of a single duty I have informed Mr Costello that in my apinion his proposition could not be granted under the law, A corresponding decision, I am award, has been had in your own Office in regard to the workmen who have enlisted in Very respectfully Yours (Digned) St. Walton) Greasurer) the army Hen James Pollock Director of the Mint.

Copy Alint of the United States, Philadelphia, April 20 1861 Hon Socretary of the Treasy U.S.
Sir: Holding myself in entire readines at any moment and at the sacrifice of Domestic & Social ties - to march with the Regiment to which am attached (2 Regt Infentry 1st Penn Wols to leave in defence of the flag and in protection of the integrity of this Union, of feel nevertheles that I also owe a duty to my Wife and five little children, and that I should not leave them entirely without means of sustenance, Forthis reason of desire, that should our Regt be ordered to march, the Treasurer of the mint shall be officially notified by the Department that I am absent on leave of absence so long as I remain in the service of the U.S. There are those who remain in this institution who are willing to perform the outies of my deck, who are enfirely competent, and no injury to the government can result from my absence, (signed) dos. Costello

MINT OF THE UNITED STATES, MELTING AND REFINING DEPARTMENT.

Philadelphia, 18 May 1861

Dear Tir

To make the subject clearer for your investigation, which you read tome yesterday as the substance of a letter, I make the following statement of feets, so par as they lie in my knowledge.

idge.

m. Phillips, who has supplied us with acids under the late contract, offered some nickel to the Director, some month or two since, at a lower rate than we had ever paid, but the Director declined purchasing because there were no funds on Cert act. to draw from. He &M.P.) subsequently of fered to sell it for The same price, Itake Cents as payment. To the objection of the Director, that there were already cents enough in the cities, he replied, by offering to dis-Tribute Mun chiefly or attogether in new England. The Director then determined to accept his offer on the following grounds, 1. That we would need a larger amount of nickel for the copper, which we had on

hand, & would be obliged to purchase some in the course of the year: 2. that the nickel was offered at a lower rate than any we had ever purchased: - 3. That we could make the purchase with employing funds, which were not on hand, & which the Divector thought might be possibly wanting, when we needed to purchase mikel: - 4 that by paying in Cents, we derived a positive profit to the government, while those cents would be distributed where they were needed: 5. that, as this method of purchase was the one formerly employed on the old cent, vir. that of purchasing the copper by the cents, the Director was justified in the purchase.

The purchase was made, Ibelieve, to the extent of some \$5000; but Mr Patterson, who keeps these accounts, can give more reliable information on this point than I can Do, as well as to the method of distribution. On the last point, my impression is, that some of the cents were retained in the mint subject to mr Phillips order, I that some of these orders were given to belams' Express company, in order to transport the cents

to a distance.

I believe this is all the knowledge I have on the subject, Las far as this goes, you will perceive, I think, that there is not the slightest deviation from integrity or impropriety in the whole transaction. Mr Patterson will, no doubt, be able to purnish you with other in formation, as to the amount purchased, to the distribution of the cents.

Very truty yours Jable Booth M. JR.

The Secretary of the Brushy Harhing how City Supply of Selver Bullion May 15, 1861.

Mint of the United States,

TREASURER'S OFFICE

Sei,

Shiladelphia, se aprie 186.

I have your communication of the 27 kinst, in reference to procuring silver coins from the Mint, and regret to state, in reply, that our means are entirely inadequate to furnishing any considerable amount. The bulk of our silver bullion, belonging to the forement is indispensable for the refining of crude gold, and if withdrawn would suspend our ability to operate on domestic bullion.

There is, as I learn on inquiry at the Banks here, no sur plus which they are willing to exchange for Gold, and the same is probably the case in Newyork. If the forenment, therefore, indispensably requires silver, there seems no recourse but to purchase foreign silver coins or bullion, for gold, in open market, and deposit it at the Mint for recoinage into such deniminations as you may require. In represent to such a purchase, if made, a consultation with the Director may be desirable, previous negotiations have ing been made the Mat Office. — Very respectfully J. E. Spenner, Eig. J. H. Walten.

newyork

In the Assist bransy we have but \$600 in solver coin; in the Mint our supply falls short of the debt to depositors.

Alint of the United States, Philadelphia, April 29 1861 Dear fin Referring to your recent letter in answer to mine of the 6 west, I have to state that the estimate of the value af the Bolivian half-dollar as given 20 years ago in the work published by the Assayers of the mint, to which you refer, is not at all adapted to the present relative balues of fold and filver either in Commera or mulage.

The inequality of payment to which I referred and which is objected by your may be illustrated as follows, fuppose the foreign to be coined into dollars to pay our foreign ministers, It would have to pay 121 cents per onnce Itandard and then coin the bullion at a rate which would only count 1164, per onnce there is much force in your remark as to the different melation of pold to filver

in South American Countries. The doublog

here worth \$15.53, or Thereabouts, is, or rather has been taken as the legal equilant af 16 filver dollars, and Commercially as high asper in the West Indies. The doubloom is however Jung way to new Systems of Coinage When I spoke of other tranches of the government to which this dispute as to the proper Standard og value en which zom falary should be paid, I referred to the Court of Claims, or perhaps the opinion of the attorney General might be an author - tive determination of the point at issue I must beg zom pardon for omitting to long to answer your letter, other pressing matter have claimed my attention and now I am abliged from the fame canoe & make my answer a very brief one. dam, benj sincerely Hon. I Randolph flay Signed Annes Rofo Frienden St Lawrence Hotel Director of the Mint

elbay 1. 1. Dear Sir. Shave pecarish your letter of the 29 th net? Majer

Assayer's Office May 29.1861.

Note for the Treasurer. In the M. Y. Mem. nº 108, Silver Bullion, There is an item of Watch cases &Bars," 818'z fine, on which no charge for refining was made. All such deposits are sure to contain tin solder, non pins de, and ue find it necessary to charge one half cent per ounce upon them. This rule is applied to every coppery alloy which is Somewhat brittle, or makes a cloudy solution; and in very refractory cases, we charge one cent; all of which is according

to the taiff of charges, and it it of course very descrable to have a complete uniformity of practice, in the two Institutions. Resty W E Dubris ass. assayer.

Jas-Polloch Egg. Dérector of the minson

Secretary of the Treasury Transfer drafts-June 1861

Mint of the United States,

TREASURER'S OFFICE

Sie,

Shiladelphia, 30 May 186-

the credit of what is termed the Bullion Projet stors account, for the 's percent crinage charge, was \$148,368.57 as the close of the 28th enist. From this deduct \$32475 about to be transperred to the Assistant heasery, and the net balance remaining is \$115,893 57

The net amount of parting charges, it available for Contingent Expenses of the illerit, was at the close of the first quarter, #5977. to at present the amount is protably about # 6400. These latter charges are not "by law required to be deposited in the Ireasury of the U.S.", as the Secretary intimates in his letter to you of the 28 thinst. They are available for incidental expenses of the ellions, and appropriated as such. By general instructions from the Department they are from time to time deposited with the assistant breasures to the credit of the Illins appropriation and so

the Silver Profits , or the gain between the price at which we issue the smaller silver to the public (#1.25 per ounce) and the price which we pay for bullion purchased for comage (now #1.21 per ounce) another a fund payable from time to time into the Preserve of the U.S. at the close of the first quarter

of this year the balance to the credit of this account was \$24,379.11 The accumulation since could not be accurately ascertained without occupying some time, but the net balance at this date is probably over \$ 35,000.

It has been customary to transfer to the heasing of the U.S. immediately after the close of each calendar year the balances standing to the credit of the accounts represent ing the 2 per cent charges and silver profits. In case of exigency the period could be anticipated: but at present it is quite convenient to the Mint to retain these funds as they serve for a small capital facilitating, after the manner of a Bullion Fund, the more rapid payment of our gold and silver depositors.

Try respectfully yours IN Wallen Great

Treasury Department 28 May 1861.

Sir,

You call the attention of the Department to the Requisition from your office of the 13, in favor of the Treasurer of the U.S. Moint, for \$32.475, I state that you mill, if desired by the Department, cause a corresponding amount to be deposited with the assistant Treasurer, to the credit of the Treasurer of the U.S. from moneys which have account from the half per cent comage charge, since the 1' of January last?

the amount of the Requisition referred to above, and concert with you, in reference to your proposition for the deposit of the same amount out of moneys on hand arising from the half per cent coinage charge - after having made the deposit, I mill thank you to report to the Department, the condition of this fund, + also what moneys there may be on hand arising from parting to their charges, that are by law required to be deposited in the Treasmy of the Venited States.

James Pollock Esq. Director ns. Mint.

Philadelphia, Pa

very respectfully,

your obest soust?

OffMe

Secretary of the Treasury.

Philadelphia June 1. 1861.

Thave received your letter of the 28th

The proportion contained in my letter of the 24th ulto having been approved by you. I have this day caused the sum of \$32.475 to be transferred to the Freading of the Ut. States, from the amount which has account from the half per cent eninge charge buclosed is the certificate of the asst. The surer of the 16. S. at This adelphia, for the transferring mostion. The half per cent comage charge, at the close of the 28th uli amounted to filt 8, 368,5%. Deducting from this amount the sum of \$32.475, paid into the Preasury of thell, States as above stated, leaves a net balance of \$115.893.57. The Silver Profits, or the gain between the price at which we issue the vilver como of lep denomination than the dollar and the price which we pay for silverbullion purchased for comage. nouffill pur ounce constitutes à fund payable from time to time into the cheasing of the the States. It the down of the your

falance to the credit of this account was \$24,379.11. The accumulation since could not be accurately ascertained without occupying some time but the net balance at this date is proposity over \$35,000.

The moneyo arising from the sources or profit of the mint on the fold and silver coinage, and are by law transferates to the masury of the U. States. It has been enstowary to transfer the same immediately after the close of each Calender year. In case of Execution the period could be auticipated, to retain these funds as they serve to facilitate, refter the manner of a bullion fund, the more rapid payment of our gold and Silver deposits, which is of much unportance to the public in the present state of funancial offairs.

The amount according from parting and other charges, available for the Contingent of the contingent first quarter of 1861, \$5.977. 40. At present the amount is about \$6.400. There charges are not "by Law required to be deposited in the Fensury of the Mr. Stare" but are available for the incidentials of the Minister and appried

as such. By general instructions from the Hepaitment they are from time to time paid into the Cheasury of the 16. States to the Eredit of the Mint appropriation and So become available for drafts in favor of the establishment. Thave the honor tote, Your ost. Denaux. Mint of the W. S. Philada, Febry 16 th 1859. Fir; The feese Walton of San Francisco. On examination of the Act of Congress establishing the Br But in California, the hower of appointing Clerks appears to be vested in the Superintendent of that Branch Mint. Part of the Ind Section of that act is at follows: - and the said Superintendent thall engage and employ as many lolerks, and as many subordinate workmen & servants as shall be provided for by law. This Act was approved July Fro1852. The mode of appointing Clerks as thus stated was the same as directed by the law establishing the harent mint, and the act which sprovided for the branches at W. Weans, Charlotte and Lahlonega. The Director at the Chrincipal mint and the Supt at the branches exercise & the right of appointing Werks up to the Sear 1851, when in consequence of some disagreement among the Officers at the Br in N. Onleans, the Greasurer of that Institution procured the papage of the foint resolution of the 3rd March 1851, which repeals so much of the Branch Brint Saw as rests the appointment of Clerks of the Theasurer in the Superintendent of each mint & further quivides that the several Treasers of the U. S. Mint be I they are hereby authorized to appoint their own clerks, subject, however, to the approval of the Secty of the Treasny. But it will be seen that after the papage of this joint resolutions, namely, on the Ford of July 1852, the Superintendent of the Br Mint in California is authorized to angage

and employ the Clerks. In the pase now under consideration the Clerk is appointed by the Treasurer. Odo not under the state of the law, Gel justified in approving the Bond, without first submitting the question to your evasideration, whether the appointment in question is legally made. There the honor Ve Hon Howell book. (signed) Chames Rop Smourden.

W. Hulseman to me bass.

Austrien Legation. Washington, 3° December? 1860.

I had the honor to address to you on the 31 May last, to which, a memorandum concerning the value of the new Austrian florin in United States Cornerey, was annexed, for the surpose of its being brandmilled to the Honorable Secretary of the Treasury, as well as to your austin dated the 23° July, commencating to me a note of the Treasury Defartment, by which the How. Secretary declines to issue the desired Trasury bercelar, as not in conformily with the existing laws of Concress, I beg leave to enclose another memoraridain whose transmission to the Commellees of Feriance good Houses of Congress, I suppose, will induce bengress to make the necessary change in

To the How fewis bafs. Sceneta postate alle United de les. the existing law. Lavail myself of this offerhood, to reilizate to jou, Sir, the assurance of my light consideration: Hillsemann

If we can be furnished with one or two florious, we will assay them here and report to the department their mins Nalue. Than the honor to be, Math frear respect, Home for Jus Semant, Same Rop Mounden. sirector of the elling How Philip & Thomas, Secretary of the Thanky, Mashing ton bity.

Sir

I have received your letter of yesterday enclosing a copy of a memorandum from ther Austrian ellimister to longrep, and asking me to report the value in bl. of. Currency, of the new Horin of Austria.

In making computations at the Custom house the austrian Horin, by the act of longress of elbay 22, 1846, was valued at 48 1/2 center, corresponding to the value of that coin as ascertained at the mint But the change in the minh value of silver, consequent whom the passage of the act of Rougress of Tob. 21. 1853, muit pauphles 427, the floring in question (half of the rix dollar) is valued at 50.65 cents (see mint report of Nov. 3. 1860 p. 35.). This of course refers to the florin i frued forin to the 1st of Novanber 1860. By the same deport it will be seen that the new union dollar", of Austria, agreeing with the new com of Trussia, and with the double thater of other German States, is valued here at 72 Cento.

I am not able to state the must Value of the new florin because none has been received for assay, and because also There is no statement as to the relation it has formation from the consulate of the 16. S. at Obiennes, under date of June 6. 1859, in respone to a circular from the creasury Department that "the value of the Aminion fold dollar is two floring, ten Kneutzers; but whether legally or Commercially is not montioned. This would make the florin equal to 4643 cents, a very near approximation to the figures stated by the Austrian ambassader, 4670. Since the passage of the act of 1853 malling gold the money of the United States and selver only change, there is a difficulty in stating the value of a Silver com as compared with a gold coin. But from what has been mentioned the Ambassader will doubtes to able to ascertain what is the value of the new ferin, as he will no doubt know what relation it bears to the "new union dollar, which as before stated is north-here 72 cents.

Office of Tohnston Brothers & Co. Baltimore Time 8 1861 McGellens Philos)

MINT OF THE UNITED STATES,

Philadelphia, 3 June 1861

Dear Sir

There has been long felt the want of a set of accounts, representing the state of this Department, during the progress of work; all that we know of its condition being ascertained once a year, when the accounts are wound up. From the seattered condition of gold silver in this Dept, it requires usually 3 to be weeks to wind up accounts; I have such a stoppage to the business of the mint will only allow it to take place once in the year, which the Mint law requires.

or frittered into fragments of leisure, Ithe time of the Upsistant M &R. is pretty bully occupied, in like mouner, both in superintending & arranging work, as well as in active duties, it would be impracticable for either or both of us, without detriment to other necessary business, to carry on such a system of daily accounts in this Dept. as would enable us to determine approxi-

mately, of frequently, The condition of the Dept, the probability of lopses incurred, from negligence or intentional wrong:

and yet such a system of accounts is very desirable, if practicable, both on my own account & on that of the gov. I think it perfectly peasible of execution, by the appointment of one in this Office, who shall perform clerical duties Abrequent weighing, so that each special lot of gold or silver may be traced with considerable exactness through its various operations, & thereby any extraordinary losses detected in time, Imore readily traced to their proper sources. I believe that the duties I have indicated will fully occupy the time of one person, The qualities of such an individual should be 1 Integrity; 2 moderate knowledge of keeping accounts; 300 Exactness in wigh ing. The rest of the knowledge requisite he will acquire after being with us for a short action dulate, it would be imposed in

land Per 1 modelly yours

Hon. James Pollock m.S.R. Director U.D. Mint

Six. I have preceived your letters of the 17th and 19th instant also, the specimen of how fold bearing quarty, the value of which will

be determined by assay.

The auxiferous black sand received from you, yielded 13. 80 og of fold 872 fine which has been deposited for comage by the Express agent, who brought the sand to the Mint. The proceeds wille formanded to you in the regular order of busines. There are two modes of treating the ansiferous black sand, and the adoption of either quest in an economical point of view, depends whose the richness of the sand. If quite poor amalgamation loved be preparable, if otherwise melting With suitaber fluxer. In the case if your sand although it proved ble very rich, both methods were tried the detail, of which will afforallyon on idea of our methods and the being deduced Thereform.

By amalgamation we took aparty the sand had it crushed and passed through a fine sieve; it was then subjected to boiling murial ic acid. The object of this was to dean the particles of fold so as to enable the mercury losearch out and take hold of it with as little lop as popille, muriatic acid being the proper solvant of the in gonater besides much Cheaper than the retric acid. After protracted tituration with mercury there resulted 52. 6 pret of foed. In order to test how elorely this worked the same sand, after the above process, was taken and melted with soda + acetatiog lead; the resulting button oflend was worked off on a bone ash test and produced \$3 procent of foll ; showing that the only amalgamation come short of being a complete operation by that much. The whole Rates there of from this bound of the Experiment, was to 2. 6+ 0. 8 say 5-3. 4 parts of fold in 100 parts of focts-sand. This fold was of course the usual silvery folk of your region the of remainstably food quality

friench being 879 2 by assay. Honem, no rdinary Working cowed be Expected tomake so entire a separation of gold as this, herformed in a laboratory on a small Seall. The other mode of treatment was tried whom two quantities of the Remaining food Sand. Ore of these was melted with soda and borax, forming a very limpid flux and from it was obtained 54. 8 per cent of foed. The other was mielted with potash, so dottoray at a high heat, and yielded & sprick of goed ent) of how. The finenes of the former was 872' and the latter 866 the from being Nemoved, 876. These three results compared to-getter, show

There three pesults compared to-gether, show a very satisfactory correspondence; and they go to prove, that the most exhibit - brown and economical treatment of such pich sands is by simple meeting. With suitable fluxes; and not by ameliand you mation.

It is important to state that when the use of mercurey is resorted to it is

it is apt to become much divided and be nashed away. This can be avoided by removing the leater and adding sufficient mitric acid to act swiftley on the mercung, the whole of the amalgain Will then from toto one mass, and it can be washed without lop or inconservence. If the black sands that have been plucked with the magnet have not been thrown away, it might be worth while for you to try what goed remains in them, by as already Englisted, and then trenting With merany. They woved provably be los pour to flux economically. Jambery Respectfully, Jas. Pollock Sometor og the mins L. ESuber Eg/1 St. Louis,

GR Treasury Department June 21. 1861 I transmit, herewith, a copy of a commumeation of the 6th of April last, from the U.S. Consul at drieste, in regard to the value of the new Austrian Silver florin - A new coin of that denomination forwarded by the said Consul is also enclosed in order that it may be assayed and its equivalent in United States currency, gold and Silver valuetion, respectively, be ascertained. You mill report the result of the assay for the enfor : mation of the Department. Jam, very) respectfully Secretary of the Treasury

James Pollock Esq? Director of the mint.— Philadelphia . Penn.

Your letter of the 21st instendering a copy of a communication from the bl. I bonoul at Freste, and a new Austrian Silver Horin, has been received.

This is the first opportunity we have had of testing the new Austrian of Corin. We are daily in spectation of receiving a few pieces by formate hand, which we will also test by Assay but in the mean. time I have to offer the forwaring report whom the price which was received with your leter.

Agreetly to the statorate & Valuable Statement supplied by land Bunch of thiste, to the histloop tooller, may 1867, (a copy of which was obligingly sut to us) the new Austrian floring, by the Impured Decree of April 27, 1868, is to be coinced at the Pate of 45 prices to the Gollpfund or new commercial pount of fermany) of fine silver, but to be alloyed to nine-tento fine bomosequently the legal seeight showed to a 397 owner troy, or 1904 grains. The price purer spannisher corresponds very closely with this wight

In respect to the finences. It shows by two assays 8984 thousand the; which is sufficiently mean to the propeled standard, to show a fair intention, and in the abonce of more pieces to operate upon , we think it right to predicate the valuation when the legal Weight and ofinences. At the price now paid by the Minteforsilver, in silver, the men florin is worth 48 cents, as near as may be this corresponds perfectly with the printer report of the mint upon the new union down of the German States (including austria) which is 72 leuts, and which is intended to be equal to one and a holy Custian flores.

It is endet therefore that the M. is borness and other functionaires in the Austrian Porpies, should be promptly pleised from the authorization of which arrives from the old Valuation of 51. 2 cents, which is now erroneous from two eauses; first from the paduetion of our Minh proce for silver, and secondly from the change

Your lotter calls for a gold as well as Silver Valuation. This honour revives the difficulty which constantly presses us, from

the obscurity of the present law of lowinge, and from the want of legal adjudication upon it. Mepay for silver, in silver, not in ford; and we pay in small coins less them the donar which are not only overvalued, but are not even a legal tender beyond five dours. If the silver dours and gold dour are legally equivalent, then the silver flowing is worth 46.2 conts. But if the mint price be the criterion, then it is worth 48. cents. Fractically and bone mercially. this latter would be the true valuation both in fold and in pilon. Herewith is enclosed 50 cents, for the fiece used. Sony thenewy Your oft. Doct. inter. Hond. P. Chare. Secretary of the Chasury, Washington lowy

James R. Enowden Dearfri I have in my posession at this time what to me is a peculiar coin-Gold. During my mamination of the specimens in the hunt at Phila, this last miter I remember to have seen nothing like it. and if issued in bal. iforma ere it became a state and afterward ligalized as I believe, it might be a valuable specimen in the must bealinet. Its description is thus: Gold-Sozie and apprecioner of a Fine Id. Gold piece. On one side is the ordinary head, but in the band of the foohead are the words "moffat reo" Sunoudry The head are the 13 Stars + beneath it piperes "1849". On the other Side the ordinary Lagle" + the words: S. M. V. lealiforma Gold. Fine Dol. It is of a light yellow color - rather hoorly execu-

ted - and the material apparently grown. There it not for the words about, it could not

he detected from our ording time. piece.

Should you deem it fit to state what position it has with our com to, you would greatly oblig you hubbe Sent Medehouoz

Box 52 Willeanoll Illinos -

From to EW. Colchoner M. Carroll Ills Relative to a California Meanul June 14th 1861 June 20/61. at this time what to me is a prevenien com-Epold. Growing my recommentar of the specimen in the mint at Phile, this least make I remember to have seen nothing like at. and it somed in bal iforma ere it become a state and externional legaling as I believe it might be a reducible sheemin in the hund bealiney. His defentation is their: Gold- sugar and appreciation of a saw the pool piece for one side is the ordering head, but in the bound of the fordread one the words multat res " Sunorunger, the beach are the 13 Etans + unearly it papers " 1869". On the other late the ordin Eugle" + the words: 3. M. W. Cettforne Gold. Fine Ed. It is of a light syllow color - rather prody lyented - and the material appearantly yourse. here it mit for the words above, it could not be detected from our value pare. piece. i should you down it for to state which wantern It him with our come tell you would greatly allege your hundle found Medihan

Sas. M. Lewis, Castr Union Bank newyork June 15/6, Rec? June 17

Mint of the United States Philadelphia June 14. 1861

A communication from the Chamber of Commerce of the State of New York addressed by mistake) to the officers of the assayers department - asking for designs and suggestions - relative to the preparation and cost of medals proposed to be distributed to the officers and soldiers engaged at Forts Sumter and Pickens; has been handed to me to answer.

Before replying to the application of the Chamber of Commerce as above I deem it proper to offer some considerations referring to this, and similar

applications on principle. While I recognize the propriety of considering the Engraver's department as the appropriate one for the disposition of this application: I think there are exroneous impressions abroad, as to the legitemate functions of the Mint in this matter: The legal obligations of the mint in the preparation and execution of does : does not extend beyond the coinage. The facility afforded by its machinery and operatives in the striking of medals - has no doubt been an advan tage to the public: but this work, even, could not be undertaken with proprie ty, if allowed to interfere injuriously with the operations required for the loinage. I am not aware of any legal provision for the design and engraving of dies. for medals as the proper business of the mint: and while therefore it may be proper to Freat all such applications as that under consideration with courtery: care should be had to guard against the admission that the mint in any of its departments as now organized by law, is under obligation to undertake such business. Whatever advantage the Minh may possess in the qualifications of its officers or employees, for the artistic work proposed - the propriety may well be questioned, of undertaking in its official capacity to compete with the work or patronage of artests without - especially if the object be to execute the work at a cheaper rate than can be afforded by other parties professionally engaged in or depending upon such occupation. That there may be exceptions to this conclusion, I am aware; but the present case does not seem to form one - It is proposed to commemmorate an event or series of events - of great historical significance in the career of our country: It should be remembered in this connection, that there are men, artists by profession) a great portion of whose lives are spent in qualifying themselves for this monumental service - They are often subjected to great privations for the want of employment; and if when the sudden expression of national gratitude calls their services into requisition: The incidental advantages of a government institution should be turned to frustrate their hopes: they have cause to complain of the interference. Let it be kept in mind, that I refer only to the action of the mint as an instrument or arm of the public service: if the shill of any individual, distinct from his obligation to the public service, can be made available to help forward a patriolic purpose, it need not and ought not to be withheld on account of his public employment in a separate capacity. with this understanding, and solely with the view to aid the object of the

MINT OF THE UNITED STATES,

MELTING AND REFINING DEPARTMENT.

Philadelphia, June 1861

Dear Jir

The Commissioners, appointed by goot to investigate the affairs of the mint reported in July, 1854. In consequence of peculations in Deposits, they recommen ded two provisions, calculated in their judgment as best adapted to protect Depositors. One of these was the use of boves under lock & key to hold the deposits until they were melted; and which has been continued wer since. The other provision was the appointment of a " Superintendent of melting", who should have charge of the boxes, independent of the weigh-clirk, I witness the charging of the melting nots with the Deposits. This has not been carried into effect. my impression from memory is, that it was tried, a soon abandoned, but for what reason I know not.

Os this last provision was recommended strongly by the Coursiefsioners, after consultation with the Officers of the Mint, I would respectfully suggest it as worthy your consideration, whether such a supervision of melting might not prove advantageous to the character of the mint, by using every practicable precaution in securing the interests of Depositors.

very respectfully yrs. Jate Booth mx.R.

MINT OF THE UNITED STATES,

MELTING AND REFINING DEPARTMENT.

Philadelphia, 24 July. 1861 Dear Fir

you may remember that I drew your attention some time since to the practice of the n-y. afray office in sending over to the mint a quantity of auriperous silver, when every reason of economy requires that they should refine such metal. It is only now first in our power to refine that silver, our own gold deposits aggregating sufficient for that purpose. Here has been a serious lop of time. We have been deprived of the use of some 12,000 ox. ofsilver, & ofall the gold it contains until now.

The arrival of this morning brings about 14,000 ox. opsilver, containing gold. now if we have to refine this silver, it will cost us about \$ 700. The charge of 5 cts. pr. ox. for refining should be made on it, in order to cover the cost of refining, according to the mint law. How can we recover this outlay? Has the afray Office made this charge? If it has, then it she be transferred to our credit with that office. If it has not, it has acted contrary to law,

d burdened the govt with an expense of some \$720.

In either case, it has thrown this and ofsilver on the mint, to be refined, when we shall not have sufficient gold on hadred to be refined with it for several weeks; so that we shall be deprived of the use of 14,000 ox. silver, sits contained gold.

The two lots of silver together amount to some 26,000 oz. A the total cost of refining it will be about \$1300.

The arrival of their morning brings about

have to refuse this silver, it well cost us about

Respectfully yours Late Booth

Hon. Jas Pollock Director

MINT OF THE UNITED STATES,

Philadelphia, 19. July. 1861

Dear Sir

By the invoice of silver rect this day from the New York Usay Office, Lobserve that the total amount is some 37,000 ox. of which over yooo ox. contains gold.

now as the process of separating gold from silver consists in metting two parts of silver with one of gold, & extracting selver by nitric acid, - and as the apay Office receives hearly all the crude gold shipped from California tobe refined, - it is manifest that the silver containing gold should be employed, that office to melted with the gold to be refined instedd of using pure selver. By this me Mod alone can the govt be indemnified for scharating gold from silver, as the cost of refining (5 ets. pr. ox.) is charged to the gold positor. If a small amount of gold is tobe reparated from a large ant of silver, The cost tothe Govt is very considerable, I the when there is no gold to be mixed with the silver, so that the refining charge may

be pard by the gold depositor.

If since this mint receives but a limited amount of gold to be refined, we are obliged either to hold back the silver, containing gold, until a sufficient and of gold deposits is rece, thus causing lops of time in returning the gold & silver; — or we must refine the silver by itself, at a considerable cost to the goot, which is contrary to the mint Law.

Since the lessay office receives so much

Since the liftay office receives so much more gold tothe refined than this mint does, I so much more frequently, it is evident that if that office retained the auriporous silver, much time would be saved, I the yout would lose nothing.

Washre mines, or any other source of brittle washre mines, or any other source of brittle metal, then it doubtless becomes the lessay before to toughen it & pit it for coinage, so the charge for toughening may fall upon the Depositor, according to law.

Very truly yours Lable. Booth MAR.

COMMERCE OF THE STATE OF NEW-YORK.

Third Annual Report of the Chamber of Commerce of the State of New-York, for the year 1860-'61. 8vo. pp. 340. Prepared by the Secretary, Mr. J. SMITH HOMANS.

This volume is filled with statistical materials of value to all who feel an interest in the commerce of the City and State of New-York. The volume opens with the proceedings of the Chamber for the year 1860, with a list of members at the close of the year, and a list of Presidents, Vice-Presidents, Secretaries and Treasurers

from the establishment of the Chamber in 1768 to this date.

Then follow elaborate tables of imports and exports of every article, of the port of New-York and of the United States. 2. Imports and exports of each State, each year, 1856—1860. 3. Real and personal property of the City of New-York, and population, each year, 1826—1860. 4. Comparative population of each County in the State by each census, 1790 to 1860. 5. Commercial treaties of the year with all nations. 6. The harbors and rivers of the United States. 7. Comparative tariffs of 1842, 1846, 1857, 1861. 8. Annual report on the harbor of New-York.

Annual reports, with copious details, on Ashes; Assay Office; Banks, Banking, Savings Banks; Boot, Shoe, Hide and Leather Trade; Breadstuffs and Provisions; California Trade; Canals; China and Tea Trade; Clearing House; Coffee Trade; Cotton; Currants; Dry Goods; Drugs; Emigration; Fire, Life and Marine Insurance; Flour; Freights to Europe, &c.; Fruits; Gold and Silver; Hemp and Jute; Molasses and Sugar; Naval Stores; Rail-Roads of New-York; Rosin; Rice; Salt; Saltpetre; Tallow; Tar; Tobacco; Wines and Liquors; Wool and other subjects.

I Smith Homans design for midul the Secretary, Mr. J. Sharn Mostro July 13.1861 atta and exports of each state, and professy that the tily of New-York and epulation, each year, 1226-1800. A. [No Report.]

IN THE HOUSE OF REPRESENTATIVES.

JULY 11, 1861.

Read a first and second time, committed to the Committee of the Whole House on the state of the Union, and ordered to be printed.

Mr. Stevens, from the Committee of Ways and Means, reported the following bill:

A BILL

Making additional appropriations for the legislative, executive, and judicial expenses of the government for the year ending the thirtieth of June, eighteen hundred and sixty-two, and appropriations of arrearages for the year ending thirtieth of June, eighteen hundred and sixty-one.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled:
- 3 That the following sums be, and the same are hereby, appro-
- 4 priated, out of any money in the treasury not otherwise ap-
- 5 propriated, for the objects hereafter expressed, for the fiscal
- 6 year ending the thirtieth of June, eighteen hundred and sixty-
- 7 two, namely:
- 8 CONTINGENT EXPENSES OF THE HOUSE OF
- 9 REPRESENTATIVES.
- 10 For compensation of the officers, clerks, messengers, and

11	others receiving an annual salary in the service of the House
12	of Representatives, one thousand seven hundred and ninety-
13	six dollars and forty cents.
14	For laborers, one thousand nine hundred and seventeen
15	dollars.

Copy Memorandum for the Director In assaying the specimen of gold bearing purites, sent by Morduber I pursued the same course as in the former lot sent by him, that is by fluxing and amalgamation. I portion after being reduced to a fine ponder was fluxed with soda acetate of lead and borax, the reduced buston of lead , worked off on a bone-ash test, yielding gold at the rate of \$9 H her low of the ore. The same and of ore mas treated with muniate acid, and amalgamated which gave a lettle over one third of The alove ant (33). The maching of the light particles from the amalgamation, as well as the heavy iron sand, was collected on a felter and afternards fluxed wish acetale of lead, the reduced button worked off on a lone-ash test, and gare at the rate of & 64. per low, in all & gof; showing that in undecomposed sulphide of now but a emall part of the gold can be collected by mashing and amalgamation, nor can there he much gam in reducing the porder so as when met to be pasty, for the gold particles, as much as they are originally are still further divided in exceeding of the ore. fact, that in some districts the tailings from gold washings, being preserved, have been norked over from time to time and paying for the operation. Norwinstandoing the difficulty, I have no doubt with system and capital miested, the over of this class will be worked wish very large in crease, and a large ant. of gold obtained, which is only to be ascertained in practical operations, and not by laboratory experiments. Respectfully J. Re. Eckfeld Hesayer

Akkelfeldt Assayer. Result of apay of Specimen of gold bearing figures from At Louis. July 2 /6/2

Of Stevens Dogs.

Sir: I have at hand your favor of yesterday, asking for the results of my experience while Meller & Refiner, as to the propriety or advantage of the custom in force during my official term of office, of granulating gold deposite before they were reported whom by the assayer. On reply I have to state that this wood by no means the uniform fractice of the Minh, and was only resorted to during heriods of unusual greekune of busines. The question as to its propriety and expediency was raised at an early speried in the operations of this Branch, and was very fully considered in all its bearings by your The decepors, as well as by the apayer and onyelf. Out was one of those expedients, to which we were in a measure driven by the inad-- equacy of the minh to the demands of Jublic interest. The only objection to the quactice is that it sometimes occurs that a deposit is not thoroughly mixed in the first melting, and as a consequence, there is a corresponding disagreement in the assays. From my experience, however, this may be said to occur, in ninety nine cases out of a hundred, - in the melting of very small deposite of mixed gold, and it is believed, that in such cases, a report of the mean of these differenced, will represent with sufficient accuracy, the assimilated fines of the Deposit to do all reasonable justice to both fasties. Certainly, the great delay in the fayment of deposits which would ensue upon an abrogation of this custom, would be, specuniarily, gar more offerepive to the deposition than the supposed lop of a few thousandths in the finench of his deposit, even a funning that it falls on him and not on the government. On support of this opinion I may mention the fact, that to my Knowledge, there never has been, upon the hart of any deposition; - a complaint at the Mint, of any real or Supposed menfficiency in its returns, growing out of a case of this Kind, X upon the other hand, the settlements of the melter & Refiner grove conclusively that the Yovernment has sustained no lop by Jursuing this quactice. I can, therefore, see no reason for its discontinuous, at

all commensurate with the very great inconvenience that would be produced to the Spublic by the inevitable delay in the Gayment of deposits which would neceparily ensue; - as well as that which would be occasioned to the Treasurer and Melter & Refiner by the consequent destruction of important checks upon the accuracy of their operations, which they can at all times maintain by having the deposite reported in order of their consecutive numbers, and operating upon them in a like manner. I am award that it chas been and may again be unged, that such a Gractice does not obtain in the mother minh or its other branches. Ot may be answered, however, that in those institutions no such necepity has ever existed, I if such had been the case, the relations which minting Establishments in the Cast bear to the Monetary arrangements & necepities of the country, are wholly different from those existing here. There, the opinicipal circulating medium of the country, in which nearly its entire internal commerce is carried on, - is featur Money, - the coinage of the Minte haking off through the indirect and limited channels of foreign commerce, or into the roults of Banking establishments, where it is hourded. The relations of those mits to the Jublic are, therefore, neither so direct, or to general as there, - and have but little of that intimate connection with the daily transactions in trade and commerce, as here, when we have only a metallic currency, I where the daily supply of our circulating medium, is derived directly from the Minh. Any obstruction, therefore, to the dispatch & efficiency of Trinting Operations here, is instantly & directly gett by our whole com-I stringency in Ginancial affairs. Then it is remembered, too, that the great bulk of the bullion which is deposited at the minh here, has been advanced upon by Jankers, Brokers or dealers, and beard on interest while it is in course of manufacture; - any unnecepary delay becomes. exceedingly officepine to the great mining interest of the state, I of such radical changes as have now been adopted, are to become germanut, I by which, the chayment of deposits much be retarded at least ten

days beyond the usual time, all the ordinary profits of labor must be consumed by these verations delays. the Thincipal considerations which have always induced me to Thursue this gractice when I deemed it necessary for the dispatch of business; and which determined one in the apumption of so much of the responsibility attaching thereto, as naturally chertained to the Officer of the Minh, most directly & seriously affected by its supposed wie gularity. Amay observe in conclusion, that though Achave been attached to the minh from its foundation of am well advised of all its operations; - the extreme cases referred to by you as the assumed basis of the apayer's objections to this practice, are wholly without my Knowledge, and are, in my opinion, wholy gratuitous. No such Tok to the government as \$ 20.000 4 has ever been Sustained by any one case, by reason of this quartice of granulating deposits before they are reported, & from the very nature of the difficulty (alm a case does arise,) it is imposible to tell who suffer, should the mean Jinenes which is assumed, not be correct, mor am Caward that these difficulties have ever been of "daily occurrence" as alleged by the apayer. At undoubtedly frequently occurs that the apayor has to make a number of re-assays, many of which however, grow out of accidents in his own defautment, & judging from the reports made to me by the late assayer, the number of cases which are ultimately found to present any serious difficulty in arriving at the exact finines are comparatively very few, I as before stated, they are nearly always found to be very small deposite. Hoping that & have July covered the ground, desired by your letter, Tenyl Cespectfully, or Oft dent. Ayria Louis a Jarnetty

* Note. 3 9.95 of this gain is and to 3 Barrels Sediment Obtained from the deep well in cellar which had not been cleaned for 5 or 10 years. In respect to the batance of gain I have to remark that although there cannot be an actual gain of gold there will occur of the gold should be of the larger denominations of coin and worked in the usual manner either a small loss or an excess in closing the Chief Corners accounts; unless there should be losses at the itsutable to other causes than those of mere mechanical trear and torre in the process of coinage —

Exhibit- of
Wastage of Gold & Silver
in Chief Coiners Department
United States Trint
at Philadelphia
from 1 Jan 1850 to 1 July 1861

U.S. MINT GENERAL CORRESPONDENCE 1861/JULY
